Who is he
CEO of Amelia Virtual Care, the first solution that allows therapists to use exposure psychotherapies for anxiety disorders through virtual reality. This passionate entrepreneur has a double degree in Physics and Electrical Engineering and a master’s degree at the University of Colorado Boulder. In 2014 he co-founded Psious, a fully international growing startup that has now evolved to Amelia Virtual Care. Along this nine years, within this startup Xavier has been contributing to the democratization of Virtual Reality use for Mental health and Digital Therapeutics.

Dynamics of the event
This after-office aims to create informal open innovation environments that facilitate networking and the creation of synergies. All this while having a few beers!

We will also have some research groups from the Xartec Salut network that will tell us what is “cooking” in the laboratories around this technology.
